Adapt to Survive (2020)

[TRAILER](#)

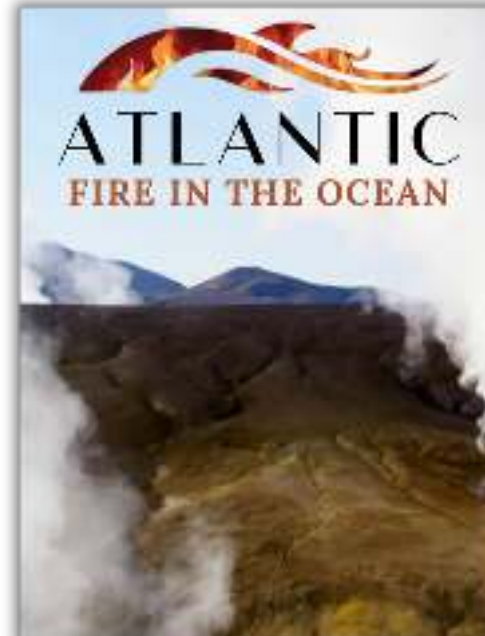

3 x 45' HD - US, CA

Earth's wildest places are home to nature's ultimate survivors—where every creature lives by one unbreakable rule: adapt or die. Adapt to Survive takes you deep into the untamed wilderness to uncover the secret strategies that allow life to endure against all odds. From ingenious hunting techniques to astonishing defenses, witness the raw power of evolution in action as animals fight to pass their legacy on to the next generation.

Atlantic: Fire in the Ocean (2017)

[TRAILER](#)

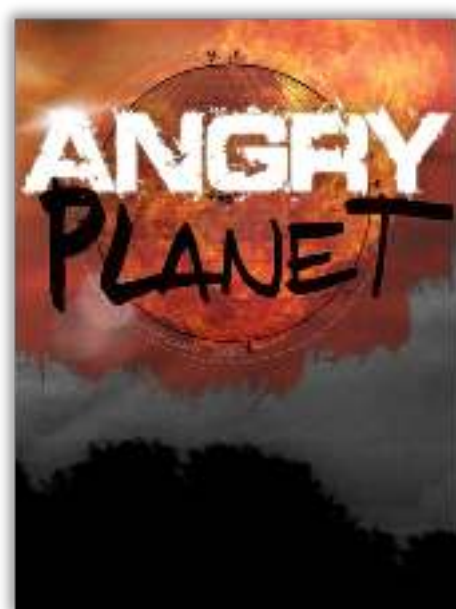

60' HD - US, CA

Rising from the depths of the Atlantic, the Mid-Atlantic Ridge has created some of the most remote and spectacular islands on Earth. From Iceland's volcanic landscapes to the icy reaches of Antarctica, these isolated worlds are home to remarkable wildlife, including vast penguin colonies and unique endemic species. This epic journey explores the untamed beauty, extreme environments, and extraordinary life that define the Atlantic islands.

Angry Planet (2006 - 2008)

[TRAILER](#)

39 x '23 HD - World

Join renowned storm chaser George Kourounis on a thrilling journey into the heart of the planet's most extreme weather events. From the fury of monster tornadoes to erupting volcanoes and deadly monsoons, Angry Planet captures the raw power of nature like never before. Witness breathtaking footage of Earth's most volatile forces and follow Kourounis as he ventures into the danger zone, pushing the limits of exploration to reveal the science behind these awe-inspiring phenomena.

Beast Legends (2010)

[TRAILER](#)

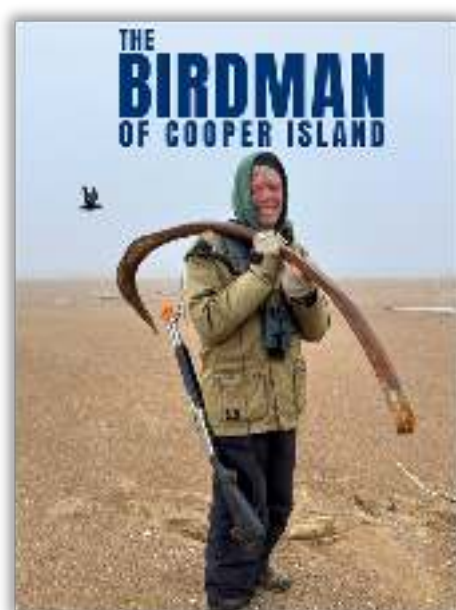

4 x '60 HD - US, CA

Beast Legends takes viewers on a thrilling journey to the frontiers of science and fantasy, exploring legendary creatures from cultures around the world. Each episode delves into the origins of an iconic beast, uncovering the landscapes and stories that gave rise to these myths. Combining cutting-edge science, history, and imagination, the series brings these legendary beings to life—revealing what they might have looked like, how they could have behaved, and whether nature holds any clues to their existence.

Birdman of Cooper Island (2024)

[TRAILER](#)

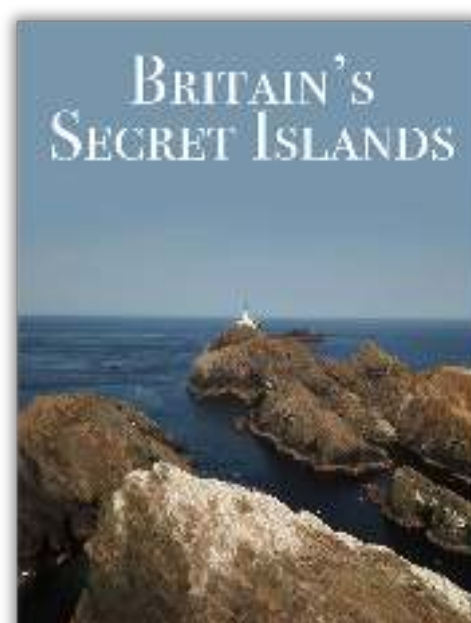

90' UHD - US, AU, NZ, UK, IE

George Divoky is the world's most intrepid birder. For 49 years, he has spent every summer alone on a tiny Arctic sandbar protecting a community of beautiful seabirds. For half that time, he's known that the creatures he adores are doomed. But he cheerfully returns every year anyway, loyal to his avian friends and curious to see how their story ends. His is a story of climate change, fleeting fame and incredible resilience at the end of the world.

Britain's Secret Islands (2022)

[TRAILER](#)

4 x '60 HD - US, CA

Set sail with explorer Stewart McPherson aboard the historic tall ship Pelican of London for an unforgettable journey around the UK. This breathtaking expedition explores the rich history, diverse wildlife, and stunning landscapes of Britain's most spectacular islands. From rugged cliffs and hidden coves to mist-shrouded shores teeming with life, experience the beauty and cultural heritage of these remote and fascinating destinations.

The Cobalt Rush: The Future Of Going Green (2022)

[TRAILER](#)

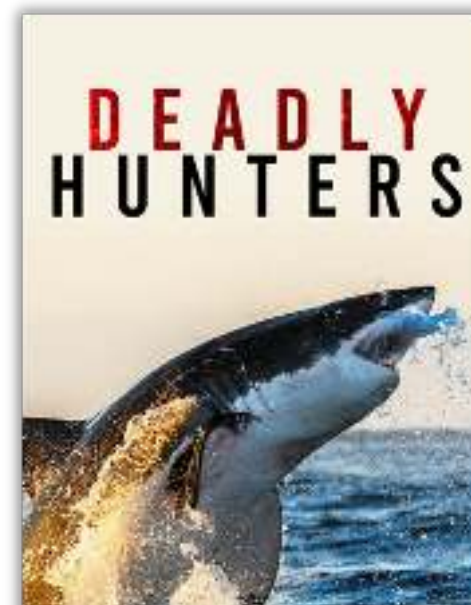

52' HD - North America, IE, AU, NZ, UK

Tomorrow's world depends on a strategic mineral used in batteries: cobalt. Mainly present in Congolese soil, it is exploited at colossal environmental and human cost. Child labour, water and air pollution, modified DNA, corruption. The film investigates the corporate and geopolitics playing out and questions the consequences of this battle being waged: how the promise of a "better world" can go with social justice.

Deadly Hunters (2020)

[TRAILER](#)

3 x 45' HD - US, CA

In the wild, survival is a relentless battle where only the strongest and most skilled hunters thrive. Deadly Hunters takes you deep into nature's most intense showdowns, revealing the instincts, tactics, and adaptations that make these predators masters of the hunt. From stealthy ambushes to high-speed chases, witness the raw power and precision of nature's fiercest warriors, brought to life through stunning cinematography and expert insights.

NATURE CATALOG

Dive Detectives (2009)

[TRAILER](#)

6 x '45 HD - World

Many of history's most extraordinary secrets lie hidden deep below the surface of our great oceans, lakes and rivers. In six exciting hour-long adventures, Dive Detectives follows father-and-son professional divers and explorers Mike and Warren Fletcher, as they travel the world to unravel gripping undersea mysteries. Together they dive into dangerous waters to find treasures and mysteries that have been swallowed up by these waters.

The Earth's Furies (2018)

[TRAILER](#)

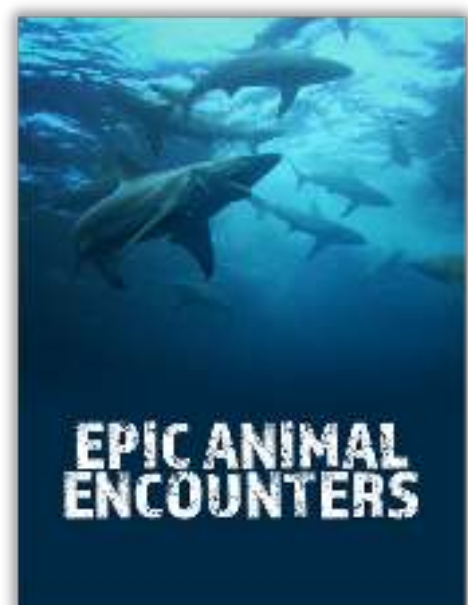

12 x '52 HD - US, CA, IR, AU, NZ, IN, ZA, UK

Raging megafires that consume landscapes for months. Super eruptions with the explosive power of a Hiroshima bomb every two minutes. Asteroid impacts that are so catastrophic they've wiped out entire species. The Earth's Furies uncovers the raw power of nature's most extreme disasters, blending cinematic storytelling with cutting-edge science to reveal the forces that have shaped, and continue to threaten our world.

Epic Animal Encounters (2019)

[TRAILER](#)

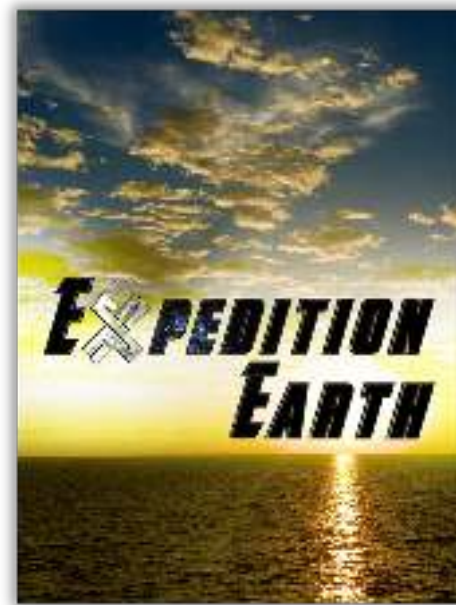

4 x 60' HD - US, CA

Brace yourself for the wildest moments nature has to offer! From jaw-dropping hunts to heart-stopping close calls, Epic Animal Encounters captures the raw, unpredictable, and awe-inspiring side of the animal kingdom. Whether deep in the wild or right in your own backyard, these once-in-a-lifetime encounters will leave you on the edge of your seat.

Expedition Earth (2016)

[TRAILER](#)

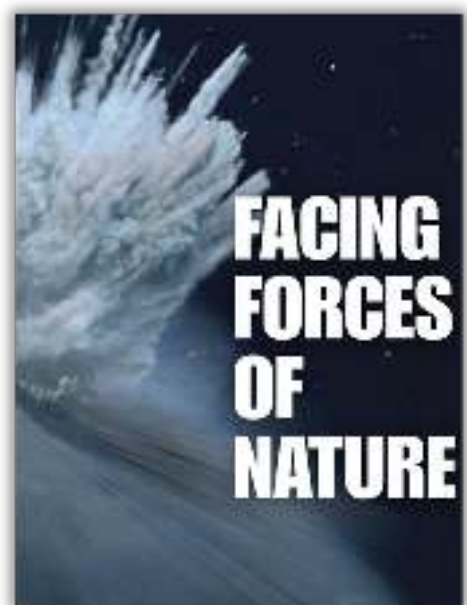

4 x 44' HD - North America, UK, IE, AU, NZ

On land and sea, Expedition Earth travels across the globe to explore the planet's most diverse ecosystems and the remarkable animals that call them home. From remote wildernesses and dense rainforests to vast oceans and frozen polar regions, the series follows scientists and explorers as they study wildlife behavior, uncover survival strategies, and reveal the delicate connections that sustain life on Earth.

Facing Forces of Nature (2023)

[TRAILER](#)

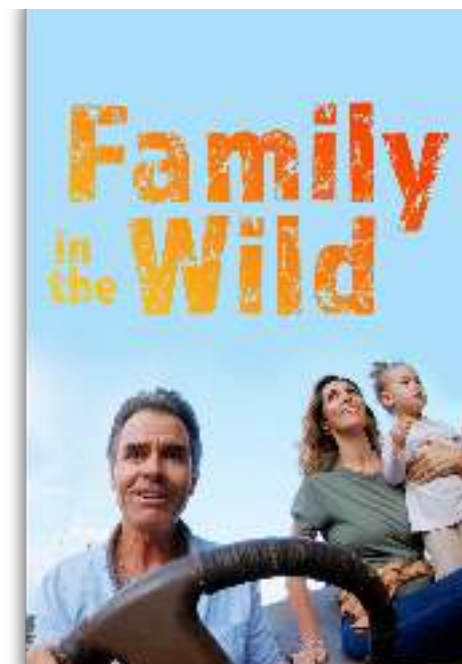

6 x 48' HD - US, CA

Whether volcanoes, tornadoes or asteroids - natural disasters are a constant threat. Our only option: Take on the challenges of natural hazards with brilliant engineering. But do we really stand a chance against these constantly worsening forces of nature? Facing Forces of Nature lets the two forces compete against each other repeatedly - different levels of technology versus nature. An exciting contest to the end.

Family in the Wild (2022)

[TRAILER](#)

24 x '24 HD - US, CA, AU, NZ

Deep in the heart of the Zimbabwean wilderness, a filmmaker shares his extraordinary life, where family and wildlife coexist in a world of breathtaking beauty and untamed challenges. From intimate encounters with majestic animals to the daily trials of surviving in the wild, Family in the Wild offers a rare glimpse into the deep bonds between humans and nature. Experience the raw power, danger, and wonder of life on the frontier like never before.

Frick I Love Nature (2021)

[TRAILER](#)

8 x 22' HD - US, AU, NZ, UK, IE

Host Gordie Lucius goes on a grand adventure to learn everything he can about nature. Each episode, he'll meet with experts, hangout with animals and explore beautiful landscapes. During his adventure he'll answer questions like: Why do geese keep attacking me? Where did life come from? Or, why are animal genitals so weird? Look out Attenborough, there's a new kid in town.

Greenland: Survival at the Edge of the World (2023)

[TRAILER](#)

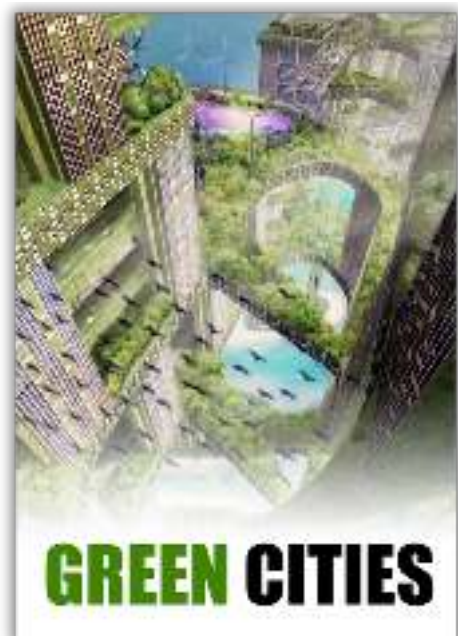

60' HD - US, CA

Explore the world's largest island, a land of ice, extremes, and breathtaking beauty. Join Stewart McPherson on a journey around Greenland, where towering glaciers, dramatic fjords, and vast ice sheets define the landscape. But as climate change accelerates, Greenland's environment is rapidly transforming. This stunning documentary captures the awe-inspiring scenery and explores how a warming world is reshaping one of the planet's last great wildernesses.

NATURE CATALOG

Green Cities (2018)

[TRAILER](#)

22' HD - US, CA

City planners study the Za'atari camp in Jordan, a city which was created and grew at a breathtaking pace - what normally took decades took weeks, and a new city was born. What can we learn from this remarkable new city in order to implement sustainable and green technologies in the massive city centres of the world?

O'Shea's Big Adventure (1999-2000)

[TRAILER](#)

25 x '24 HD - World

Join Mark O'Shea, Britain's own answer to Crocodile Dundee, on an extraordinary expedition through the diverse landscapes of the Americas in search of the earth's rarest and most dangerous reptiles. From the rocky hillsides of North America, where elusive species hide in plain sight, to the lush, vibrant jungles of South America, teeming with life, and the stark, breathtaking wilderness of the Patagonian Steppe, O'Shea immerses himself in the captivating world of these incredible creatures.

Megafires: The Global Threat (2020)

[TRAILER](#)

90' HD - North America, UK, IE, AU, NZ

Wildfires are ravaging forests worldwide, burning 350 million hectares annually. The fire season in the US is now two months longer, with annual burn areas tripling. This film travels to Europe, the US, Canada, and Indonesia to meet scientists, firefighters, and experts investigating why fires are worsening and how we can protect ourselves. Can we learn to live with megafires before our communities and forests are destroyed?

Rainforest First - Climate Protection in Central Africa (2021)

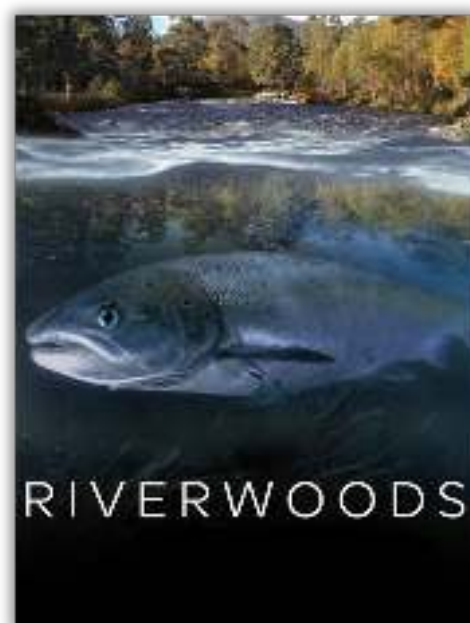

51' HD - World

Climate change is placing enormous pressure on Africa's rainforests. Rising temperatures, changing rainfall patterns, and deforestation threaten these vital ecosystems and the wildlife they support. As some of the world's most important carbon sinks, their survival is critical in the fight against global warming. But can conservation, restoration, and sustainable development help protect Africa's forests before it's too late?

Riverwoods (2022)

[TRAILER](#)

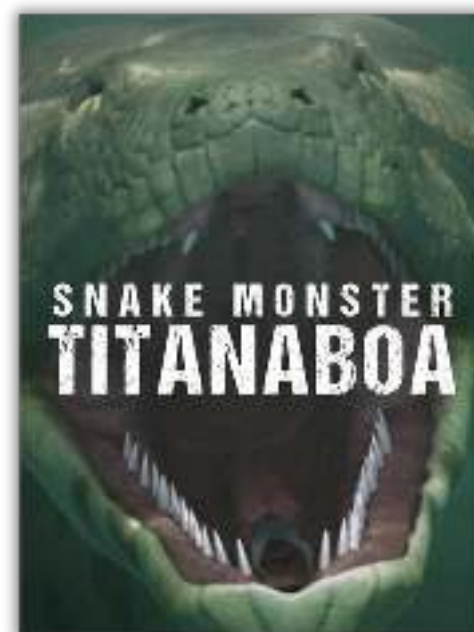

60' HD - US, CA

Riverwoods explores the perilous state of Scotland's salmon and the extraordinary relationship between fish and forest. Through the work of expert scientists and stunning visual storytelling, the film reveals how Scotland's rivers have declined—and how they could be restored through a shared vision of recovery. The salmon need the forest, the forest needs the salmon, and Scotland needs them both.

Snake Monster: Titanboa (2011)

[TRAILER](#)

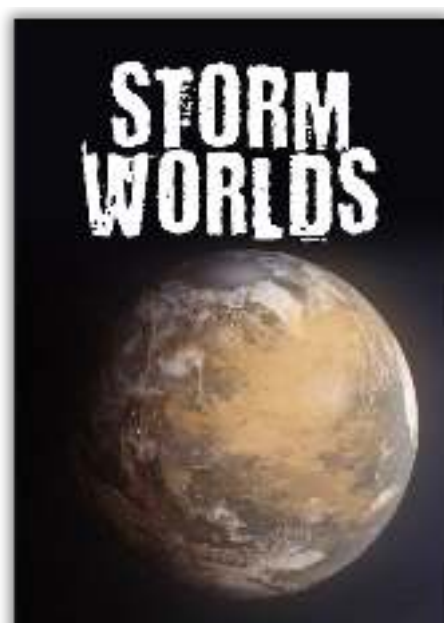

87' HD - CA

In a Colombian coal mine, scientists uncover a lost world where giant creatures thrived long after the dinosaurs disappeared. Home to enormous turtles, massive crocodilians, and Titanboa—the largest snake ever discovered—this remarkable fossil site reveals a prehistoric ecosystem of giants. Follow the team behind the discovery as they return to Colombia to uncover its secrets.

Storm Worlds (2010)

[TRAILER](#)

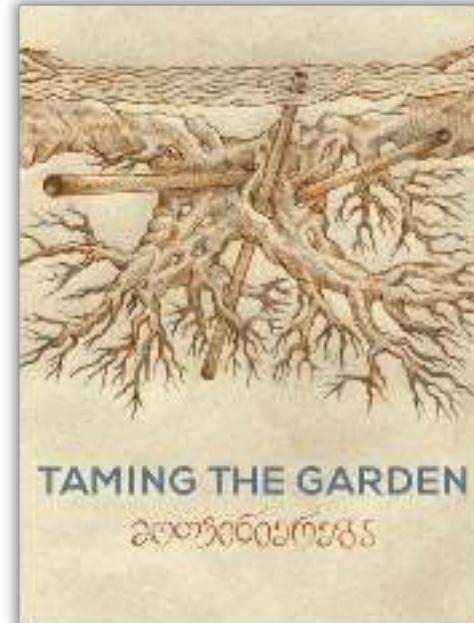

3 x '50 HD - World

What if Earth faced the most extreme storms in the universe? In this groundbreaking three-part series, scientists reimagine alien weather, from supercharged gas storms and acid rain to planet-sized hurricanes, unleashing them on Earth to reveal our connection to other worlds. Combining cutting-edge science with stunning visuals, Storm Worlds explores the most powerful forces in the galaxy.

Taming The Garden (2021)

[TRAILER](#)

92' HD - US, CA

A powerful, anonymous man has developed an unusual hobby: collecting century-old trees for his private garden. Along Georgia's coast, massive trees are excavated and transported, transforming landscapes and disrupting the lives of nearby residents. As the film follows these extraordinary relocations, it explores the values and tensions within modern Georgian society, where the act of uprooting becomes a powerful reflection on displacement and forced migration.

NATURE CATALOG

Ultimate Oceans (2022)

[TRAILER](#)

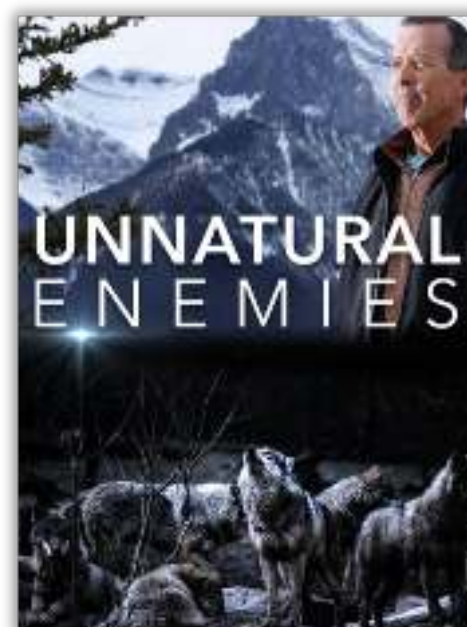

Ultimate Oceans dives into the heart of the sea, where raw power meets breathtaking beauty. From giant predators to legendary ocean creatures, discover the extraordinary animals that inhabit the depths and their constant battle for survival. With stunning visuals and fascinating insights, this series brings the mysteries of the ocean to life like never before.

3 x '45 HD - US, CA

Unnatural Enemies: The War On Wolves (2015)

[TRAILER](#)

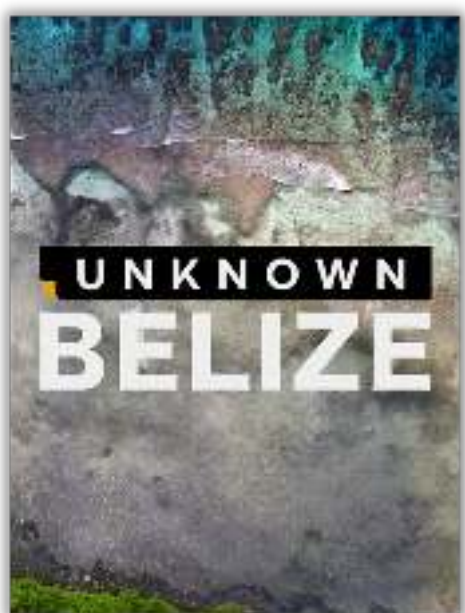

Naturalist Kevin Van Tighem is on a determined mission to protect endangered wolves and the fragile ecosystems of the Canadian Rockies. As he tracks wolves in the wilderness, conducts field research, and engages with ranchers, environmental advocates, and government officials, the film explores the complex challenges of wildlife conservation and the ongoing effort to balance human interests with the protection of one of North America's most iconic predators.

43' HD - North America, UK, IE, AU, NZ

Unknown Belize (2023)

[TRAILER](#)

In this four-part series, we follow Belizean celebrity chef, Sean Kuylen, and LA-based journalist, Gelareh Darabi, as they travel through Belize, from north to south, exploring the wonders of its natural environment. They witness the astonishing range of landscapes and ecosystems, from idyllic islands to forests and wetlands, and meet local conservationists hard at work ensuring the protection of this rich and diverse land.

4 x 45' HD - US, CA

Viking Quest: America (2024)

[TRAILER](#)

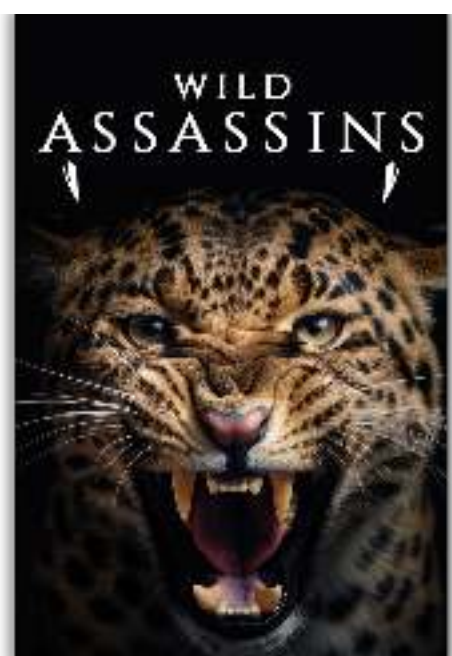

Embark on a thrilling adventure with Vikings Quest: America, as the reimagined Viking ship, Draken, sets sail on an epic journey across the seas. Led by a modern crew, this groundbreaking series dives deep into the latest Viking research, revealing new discoveries about their history, culture, and legendary voyages. Get ready for a voyage that will change everything you thought you knew about these legendary explorers.

6 x '43 HD - US, CA

Wild Assassins (2023)

[TRAILER](#)

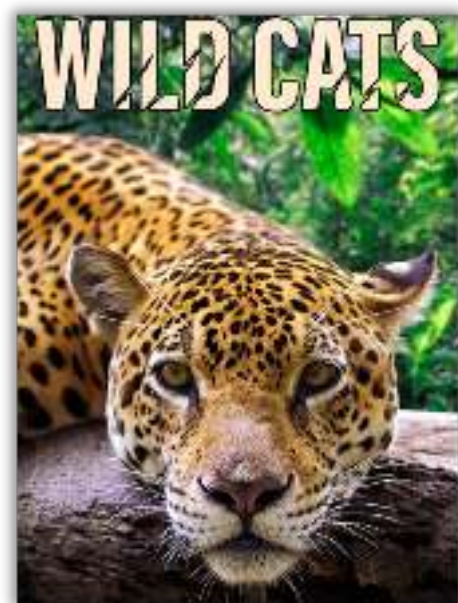

This gripping wildlife series offers an intimate look at some of the deadliest creatures on Earth. Each episode explores the animal kingdom's most intense survival strategies, revealing the tactics, adaptations, and natural weapons used by predators and prey alike. Through breathtaking footage and expert insights, discover the power, instinct, and intelligence that shape life and death in the wild.

8 x '45 HD - CA, US, ZA, AU, NZ

Wild Cats (2023)

[TRAILER](#)

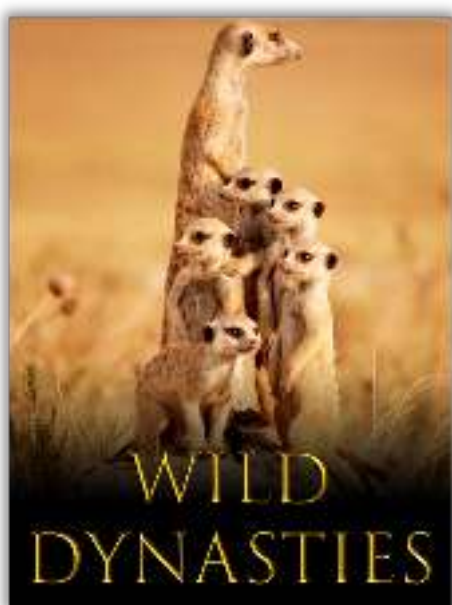

Across 3 episodes, WILDCATS will take you on a journey from the snow-covered mountains of North America to the magnificent Amazon Rainforest, through sub-Saharan Africa to the jungles of India. Discover the unique ways in which each of our wild cats has adapted to their environments and the strains they face in the wake of habitat loss, hunting and climate change.

3 x 48' HD - US, ZA

Wild Dynasties (2020)

[TRAILER](#)

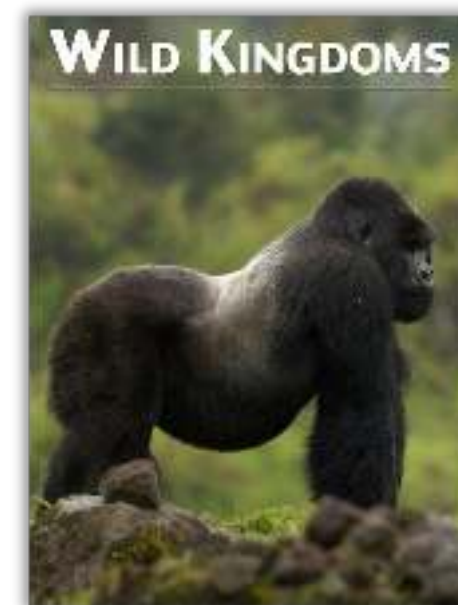

Wild Dynasties takes you inside the world of nature's most extraordinary partnerships, where survival depends on strategy, cooperation, and instinct.
